SIMAG Spring Webinars

After the success of the First webinar series held in Autumn 2020, the Italian Society of Environmental Mutagenesis and Genomics (SIMAG) is launching the Spring 2021 edition, to improve communication and discussion in this period of travel restrictions. Prof. Silvio de Flora, honorary member and former President of the Society, will open this second Webinar Series. In continuity with the First Webinar series, the following presentations will be held by new SIMAG members, as well as by young components of research groups active in the Society.

Abstracts will be published in the SIMAG website (<http://www.sima-g.it/>).

To attend the webinars, please connect to the SIMAG website and follow the link.

20th April 2021, 2.30-3.30 pm
